

## DAILY COVID-19 UPDATE

October 28, 2020

### WHAT HAPPENED TODAY

As of today, more than 8.8 million people in the U.S. have been infected with the coronavirus. Approximately 50% of U.S. states have seen their highest daily coronavirus infection rates in the month of October, with 72,000 new cases being reported per day -- a 41% increase in the average daily case count over the past two weeks. Specifically, the third wave of the pandemic has been sweeping across the Midwestern and Western states. In particular, North Dakota, South Dakota, Montana, Wisconsin, and Wyoming are at **highest-risk** and among a group of numerous other states being advised to issue stay-at-home orders.

The spread of the virus is expected to increase and hospitalizations and deaths are expected to grow in the colder months ahead as a greater number of people socialize indoors. In Europe, COVID-19 cases rose by 33% last week, accounting for the greatest

### LATEST STATISTICS

There are a total of **44,304,816** confirmed cases worldwide, 1,171,119 deaths and 29,888,430 people have recovered.

There are **8,833,396** confirmed cases of the coronavirus in the U.S., 227,320 deaths and 3,487,666 people have recovered.
