Fact Sheet: Equipment Finance in the Medical Equipment Industry

Equipment Financing Volume
According to the Equipment Leasing and Finance Association’s (ELFA) 2017 Survey of Equipment Finance Activity, in 2016:

- As an end-user of equipment finance, the health services industry represented 6.5% of new business volume reported by ELFA member companies, down from 6.7% in 2015.
- Medical equipment represented 4.3% of new business volume reported by ELFA member companies, down from 4.5% in 2015.
Medical imaging, diagnostic, surgical and electronic devices represented 3.5% of equipment financing new business volume reported by ELFA member companies, unchanged from 2015.

Furniture, fixtures and equipment (FF&E) for hospitals and other medical building represented 0.2% of equipment financing new business volume reported by ELFA member companies, down from 0.3% in 2015.

The Equipment Leasing & Finance Foundation’s *U.S. Equipment Finance Market Study: 2016-2017* reported that in 2015:

- 78% of respondents in a survey of businesses used at least one form of financing when acquiring equipment.
- This is an increase from 72% of respondents from the 2012 Foundation market study, and represents an increase in the overall propensity to finance.
- 68% of the total value of equipment and software acquired was financed, a significant increase from the previous estimate of 55% forecast in the 2012 Foundation market study.

**Equipment Market**
According to the 2017 “What’s Hot, What’s Not” Equipment Leasing Trends Report authored by Carl Chrappa of The Alta Group LLC, based on a survey of ELFA members to measure industry perceptions of equipment types:

- Medical equipment ranked second in portfolio preference among equipment finance executives surveyed for the second consecutive year. It also ranked first in residual value increase.
- The ranking is believed to be linked to a better understanding of the impact of the Affordable Care Act on hospitals and clinics.
- The medical industry’s preference for leased equipment continues unabated, driven by demographics linked to the increasing health care needs of the ‘baby-boom’ generation.
- Various potential Deficit Reduction Act (DRA) reimbursement cuts and rules are weakening some new equipment markets while, at the same time, potentially making some used equipment more desirable.
- The medical equipment secondary market is robust; the refurbished equipment market is forecast to grow sharply from 2016 levels at an estimated 12.5% compound annual rate, reaching approximately $9.4 billion by 2019.

**Investment**
According to the Equipment Leasing & Finance Foundation’s *Q3 2017 Equipment Leasing & Finance U.S. Economic Outlook*:

- Medical equipment investment growth is likely to weaken through the end of 2017.
- Investment in medical equipment increased at a 5.5% annualized rate in Q1 2017 and in July 2017 was up 4% year over year.
