

U.S. Equipment & Software

Investment Momentum Monitor

April 2026

The Equipment Leasing & Finance Association (ELFA) is the leading trade association for the \$1.3 trillion U.S. equipment finance industry. We are the voice of an industry that provides the vital capital needed for businesses to acquire equipment and drive economic growth. Our diverse membership includes financial services companies, manufacturers, and service providers dedicated to financing capital goods. Through our work, we advance and promote the equipment leasing and finance industry to empower businesses and solve the most pressing challenges facing our sector.

U.S. Equipment & Software Investment Momentum Monitor

About the Forecasts

Business leaders require actionable forward-looking intelligence to make strategic decisions. Accordingly, the Equipment Leasing & Finance Association commissioned Keybridge LLC to develop a series of custom leading indicators for the equipment sector. Published monthly, the “U.S. Equipment & Software Investment Momentum Monitor” consists of indices for the seven equipment and software investment verticals listed below. These indices are designed to identify turning points in their respective investment cycles with an approximate 5–8-month lead time.

The Momentum Monitor is based on Keybridge’s extensive research which shows that not all movements in economic data are reliable signals of future economic trends. Keybridge has operationalized its research by constructing indices, each comprised of 15–20 high-frequency indicators. These indicators undergo rigorous testing to determine the optimal thresholds at which their short-term fluctuations are economically meaningful. In simpler terms, the Momentum Monitor sifts out the “noise” in the data and identifies the dominant trends. As a result, each Momentum Monitor index is statistically optimized to signal turning points in the investment cycle without giving false readings of shifts in momentum.

The Momentum Monitor covers seven equipment and software verticals as defined by the U.S. Department of Commerce. Collectively, these verticals represent more than 90% of total equipment and software investment as of 2025.

U.S. Equipment & Software Investment Momentum Monitor – 7 Verticals

- 1) Agriculture Machinery
- 2) Construction Machinery
- 3) Energy & Electrical Equipment
- 4) Industrial Equipment
- 5) Medical Equipment
- 6) Technology Equipment & Software
- 7) Transportation Equipment

April 2026

Momentum Monitor Sector Matrix

The matrix above summarizes the current values of each of the seven Equipment & Software Investment Momentum Indices based on two factors:

- **“Recent Momentum”** (vertical axis) represents an indicator’s movement in the past month relative to its average movement over the previous three months. Ratings closer to “0” represent an indicator that is decelerating, while ratings closer to “10” represent an indicator that is accelerating.
- **“Historical Strength”** (horizontal axis) represents an indicator’s strength over the last three months relative to its typical level over the last two decades. Ratings closer to “0” represent an indicator that is historically weak, while ratings closer to “10” represent an indicator that is historically strong.

The matrix is comprised of four quadrants, which correspond to a vertical’s recent momentum and historical strength readings. If a vertical is located in the top-left quadrant, its current reading is higher than average, but positive movement has slowed (and perhaps reversed) in recent months — suggesting that Y/Y investment growth may fall over the next two quarters. Conversely, if a vertical is located in the bottom-right quadrant, its current reading is lower than average, but recent movement shows promise — suggesting that Y/Y investment growth may rise over the next two quarters.

U.S. Equipment & Software Investment Momentum Monitor

Definitions and Distribution of Investment by Vertical

*Other includes furniture and fixtures, office equipment, service industry machinery, nonmedical instruments, and other miscellaneous items.

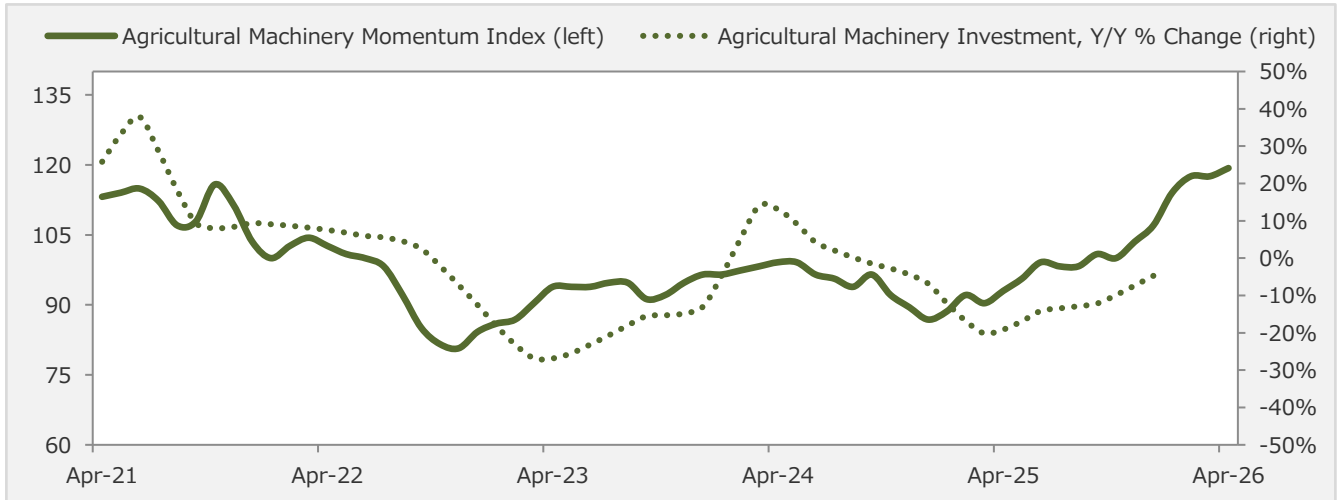

Agriculture Machinery	Agricultural machinery includes farm machinery and equipment, farm-type (power take-off hp) wheel tractors, and other agricultural equipment.
Construction Equipment	Construction machinery includes mixers, pavers, and related equipment, tractor shovel loaders, graders, rollers, compactors, and forklifts.
Energy & Electrical Equipment	Energy and electrical equipment includes (1) mining and oilfield machinery and (2) electrical transmission, distribution, and industrial apparatus such as generators, electric power transformers, switchgear and board apparatus, and semiconductor power conversion apparatus.
Industrial Equipment	Industrial equipment includes fabricated metal products, engines and turbines (including steam engines and internal combustion engines), metalworking machinery, special industry machinery, general industrial equipment, and materials handling equipment.
Medical Equipment	Medical equipment includes medical imaging equipment, electronic medical equipment, surgical and medical instruments, dental equipment and supplies, irradiation apparatus, and electromedical apparatus.
Technological Equipment & Software	Technology equipment includes (1) communications equipment such as data networking equipment, telephone apparatus, and navigation & guidance systems; (2) computers, including host and multiuser mainframe computers and servers, portable computers, personal computers and workstations, storage devices, terminals, and peripheral equipment, displays, and printers; and (3) software, including prepackaged and customized software.
Transportation Equipment	Transportation equipment includes light trucks (including utility vehicles), other trucks, buses, and truck trailers, autos, aircraft, ships and boats, and railroad equipment.

U.S. Equipment & Software Investment Momentum Monitor

Agricultural Machinery

Investment in Agricultural Machinery fell 7.4% (annualized) in Q4 2025 and is 4.7% below its year-ago level. The Agricultural Machinery Momentum Index increased from 117.5 (revised) in March to 119.3 in April. The Index grew due to improvements in several indicators: the USD/Chinese Yuan futures exchange rate was 4.1% higher in March than a year earlier, and lamb and mutton production rose 3.8% M/M in February. Overall, the Index's position and recent upward trend continue to suggest that annual growth in agricultural machinery investment should strengthen over the next two quarters.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	-4.7%
Investment Growth (Q/Q, SAAR)	-7.4%
Vertical Investment (SAAR)	\$28.0 Billion
Share of Total E&S Investment	1.2%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Construction Machinery

Investment in Construction Machinery dipped 0.1% (annualized) in Q4 2025 but rose 14% Y/Y. The Construction Machinery Momentum Index edged up from 103.7 (unrevised) in March to 104.6 in April. The Index's uptick was driven by a 4.9% Y/Y growth in existing home sales in February and a 10% M/M increase in the median number of months on market for newly completed homes in January, offsetting a 12% M/M drop in multifamily housing permits in January. The Index's position suggests that annual growth in construction machinery investment will remain strong over the next six months.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	+14.0%
Investment Growth (Q/Q, SAAR)	-0.1%
Vertical Investment (SAAR)	\$51.1 Billion
Share of Total Investment	2.2%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Energy & Electrical Equipment

Investment in Energy & Electrical Equipment decreased 8.7% (annualized) in Q4 2025 and ticked down 0.1% Y/Y. The Energy & Electrical Momentum Index inched down from 114.9 (unrevised) in March to 114.0 in April. A 51% M/M spike in the price of copper (a key input in energy & electrical equipment) in March pushed the Index lower, offsetting gains in diesel fuel prices (+32% M/M in March) and new orders of mining and oilfield machinery goods (+29% Y/Y in January). Despite this month's slight dip, the Index remains elevated, pointing to solid annual growth in energy & electrical equipment investment over the next two quarters.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	-0.1%
Investment Growth (Q/Q, SAAR)	-8.7%
Vertical Investment (SAAR)	\$81.3 Billion
Share of Total Investment	3.5%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Industrial Equipment

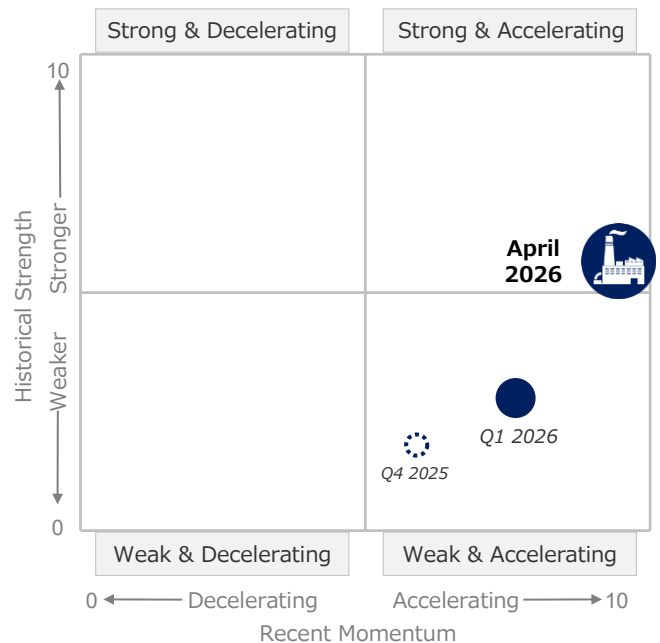

Investment in Industrial Equipment ticked down 0.6% (annualized) in Q4 2025 but remains 3.1% above its year-ago level. The Industrial Equipment Momentum Index climbed from 100.8 (unrevised) in March to 107.4 in April. Several indicators contributed to the Index's growth: manufacturing employment rose by 15,000 jobs M/M in March while capacity utilization of electrical equipment manufacturing ticked up 0.9 pt M/M in February. With the Index rising steadily over the past six months, annual growth in industrial equipment investment should improve over the next two quarters.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	+3.1%
Investment Growth (Q/Q, SAAR)	-0.6%
Vertical Investment (SAAR)	\$203.6 Billion
Share of Total Investment	8.8%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Medical Equipment

Investment in Medical Equipment decreased 10% (annualized) in Q4 2025 and is down 0.8% from its year-ago level. The Medical Equipment Momentum Index grew from 96.0 (revised) in March to 98.4 in April. The Index's improvement stemmed from a 5.3% Y/Y increase in the population over 65 in March and a 1.1% M/M uptick in the industrial production of electrical equipment in February, which offset weaker hourly earnings in health & education (-0.2% M/M in March). Looking ahead, the Index indicates that annual medical equipment investment growth likely bottomed out in Q4 2025 and is expected to improve over the next six months

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	-0.8%
Investment Growth (Q/Q, SAAR)	-10.0%
Vertical Investment (SAAR)	\$119.3 Billion
Share of Total Investment	5.1%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Technology Equipment & Software

Investment in Technology Equipment & Software rose 22% (annualized) in Q4 2025 and is up 22% on an annual basis. The Technology Equipment & Software Momentum Index held steady at 104.3 (revised) from March to April. A contraction in information technology employment (-13,200 jobs M/M in March) weighed on the Index but was counterbalanced by growth in consumer prices for computer and software accessories (+8.0% Y/Y in February). Overall, the Index suggests annual growth in technology equipment and software will remain solid but moderate slightly over the next six months

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	+21.9%
Investment Growth (Q/Q, SAAR)	+21.6%
Vertical Investment (SAAR)	\$1.4 Trillion
Share of Total Investment	59.9%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Transportation Equipment

Investment in Transportation Equipment fell 29% (annualized) in Q4 2025 and is down 2.8% from its year-ago level. The Transportation Equipment Momentum Index edged down from 89.0 (revised) in March to 88.2 in April. The Index's momentum slowed due to contractions in several indicators, including motor vehicle parts manufacturing (-0.5% M/M in February) and shipments of light trucks (-1.7% M/M in January). Overall, the Index's current position suggests annual investment in transportation equipment is likely to weaken further over the next two quarters.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	-2.8%
Investment Growth (Q/Q, SAAR)	-29.1%
Vertical Investment (SAAR)	\$292.5 Billion
Share of Total Investment	12.6%

U.S. Equipment & Software Investment Momentum Monitor

How to Read the Monitors

Each Momentum Monitor index signals the direction and magnitude of expected growth in equipment investment over the next six months. It is important to note that index values do not correspond to specific growth rates. Instead, the Momentum Monitor indices should be interpreted within the context of prior index readings and investment growth. For example, there are several simple rules to follow when examining the latest index values:

- 1 At point 1, the Index is **increasing** and signals that **investment is likely to accelerate** over the next six months. Notice in the chart below that the bold blue line (the Index) peaks first, followed by investment growth (the dotted dark blue line).
- 2 At point 2, the Index is **decreasing** and signals that **investment is likely to decelerate/weaken** over the next six months. However, given that investment growth is roughly 8% Y/Y at point 2 (as denoted by the right axis), growth will likely remain positive.
- 3 At point 3, the Index is **relatively flat** and signals that **no significant change in investment** over the next six months.

To help the reader interpret the latest Momentum Monitor signals, a summary report for each equipment vertical follows a specific template:

- (1) The first sentence reports the latest annual growth rate for investment in a given equipment vertical, providing context for interpreting the Index's near-term growth signal.
- (2) The second sentence conveys the Index's current reading compared to recent readings.
- (3) The third sentence describes recent movements in key indicators that influenced the Index's latest reading. In many cases, certain indicators will contribute positively to the Index while others will detract from it — the Index reading reflects these offsetting impacts.
- (4) The fourth sentence provides a directional forecast for year-over-year investment growth over the next two quarters based on the Index's recent movement and historical strength.

U.S. Equipment & Software Investment Momentum Monitor

How to Use the Monitors

The Momentum Monitor is designed to provide an accurate and reliable signal of turning points in the investment cycle for seven equipment verticals, making it a valuable leading indicator for the equipment finance industry. ELFA members can use forward-looking Momentum Monitor data to assess their portfolios against likely future trends in equipment investment activity. In practice, this could mean setting more aggressive growth targets for specific types of equipment during times of relative strength or tempering expectations and scaling back or delaying expansion plans during times of relative weakness. Firms that read the Momentum Monitor each month and use it to inform their strategic planning will be better positioned to quickly adapt to changing market conditions as they emerge.

For example, the May 2022 Momentum Index for Transportation Equipment pointed to improving growth in annual transportation equipment investment over the next six months. A prediction that turned out to be accurate, as investment went from -16% Y/Y in May 2022 to a peak of 37% Y/Y in June 2023.

Importantly, the Momentum Monitor is most powerful when paired with complementary data sources. Broad indicators like GDP provide context for overall business conditions while sector-specific data like ELFA's [CapEx Finance Index](#) (CFI) and [Monthly Confidence Index](#) (MCI-EFI) can support or temper expectations set by the Monitors. The CFI, in particular, has been shown to be a leading indicator for economic forecasting. Used together, these tools help ELFA members interpret current market conditions, anticipate near-turn upswings and downswings, and ultimately make better business decisions using economic data.
