

EQUIPMENT LEASING &
FINANCE ASSOCIATION

U.S. Equipment & Software

Investment Momentum Monitor

August 2026

The Equipment Leasing & Finance Association (ELFA) is the leading trade association for the \$1.3 trillion U.S. equipment finance industry. We are the voice of an industry that provides the vital capital needed for businesses to acquire equipment and drive economic growth. Our diverse membership includes financial services companies, manufacturers, and service providers dedicated to financing capital goods. Through our work, we advance and promote the equipment leasing and finance industry to empower businesses and solve the most pressing challenges facing our sector.

U.S. Equipment & Software Investment Momentum Monitor

About the Forecasts

Business leaders require actionable forward-looking intelligence to make strategic decisions. Accordingly, the Equipment Leasing & Finance Association commissioned Keybridge LLC to develop a series of custom leading indicators for the equipment sector. Published monthly, the “U.S. Equipment & Software Investment Momentum Monitor” consists of indices for the seven equipment and software investment verticals listed below. These indices are designed to identify turning points in their respective investment cycles with an approximate 5–8-month lead time.

The Momentum Monitor is based on Keybridge’s extensive research which shows that not all movements in economic data are reliable signals of future economic trends. Keybridge has operationalized its research by constructing indices, each comprised of 15–20 high-frequency indicators. These indicators undergo rigorous testing to determine the optimal thresholds at which their short-term fluctuations are economically meaningful. In simpler terms, the Momentum Monitor sifts out the “noise” in the data and identifies the dominant trends. As a result, each Momentum Monitor index is statistically optimized to signal turning points in the investment cycle without giving false readings of shifts in momentum.

The Momentum Monitor covers seven equipment and software verticals as defined by the U.S. Department of Commerce. Collectively, these verticals represent more than 90% of total equipment and software investment as of 2025.

U.S. Equipment & Software Investment Momentum Monitor – 7 Verticals

- 1) Agriculture Machinery
- 2) Construction Machinery
- 3) Energy & Electrical Equipment
- 4) Industrial Equipment
- 5) Medical Equipment
- 6) Technology Equipment & Software
- 7) Transportation Equipment

U.S. Equipment & Software Investment Momentum Monitor

August 2026

Momentum Monitor Sector Matrix

The matrix above summarizes the current values of each of the seven Equipment & Software Investment Momentum Indices based on two factors:

- **"Recent Momentum"** (vertical axis) represents an indicator's movement in the past month relative to its average movement over the previous three months. Ratings closer to "0" represent an indicator that is decelerating, while ratings closer to "10" represent an indicator that is accelerating.
- **"Historical Strength"** (horizontal axis) represents an indicator's strength over the last three months relative to its typical level over the last two decades. Ratings closer to "0" represent an indicator that is historically weak, while ratings closer to "10" represent an indicator that is historically strong.

The matrix is comprised of four quadrants, which correspond to a vertical's recent momentum and historical strength readings. If a vertical is located in the top-left quadrant, its current reading is higher than average, but positive movement has slowed (and perhaps reversed) in recent months — suggesting that Y/Y investment growth may fall over the next two quarters. Conversely, if a vertical is located in the bottom-right quadrant, its current reading is lower than average, but recent movement shows promise — suggesting that Y/Y investment growth may rise over the next two quarters.

U.S. Equipment & Software Investment Momentum Monitor

Definitions and Distribution of Investment by Vertical

*Other includes furniture and fixtures, office equipment, service industry machinery, nonmedical instruments, and other miscellaneous items.
Note: Percentages may not sum to 100% due to rounding.

Agriculture Machinery	Agricultural machinery includes farm machinery and equipment, farm-type (power take-off hp) wheel tractors, and other agricultural equipment.
Construction Equipment	Construction machinery includes mixers, pavers, and related equipment, tractor shovel loaders, graders, rollers, compactors, and forklifts.
Energy & Electrical Equipment	Energy and electrical equipment includes (1) mining and oilfield machinery and (2) electrical transmission, distribution, and industrial apparatus such as generators, electric power transformers, switchgear and board apparatus, and semiconductor power conversion apparatus.
Industrial Equipment	Industrial equipment includes fabricated metal products, engines and turbines (including steam engines and internal combustion engines), metalworking machinery, special industry machinery, general industrial equipment, and materials handling equipment.
Medical Equipment	Medical equipment includes medical imaging equipment, electronic medical equipment, surgical and medical instruments, dental equipment and supplies, irradiation apparatus, and electromedical apparatus.
Technological Equipment & Software	Technology equipment includes (1) communications equipment such as data networking equipment, telephone apparatus, and navigation & guidance systems; (2) computers, including host and multiuser mainframe computers and servers, portable computers, personal computers and workstations, storage devices, terminals, and peripheral equipment, displays, and printers; and (3) software, including prepackaged and customized software.
Transportation Equipment	Transportation equipment includes light trucks (including utility vehicles), other trucks, buses, and truck trailers, autos, aircraft, ships and boats, and railroad equipment.

U.S. Equipment & Software Investment Momentum Monitor

Agricultural Machinery

Investment in Agricultural Machinery contracted -25.4% (annualized) in Q2 2026 and is down 6.9% compared to one year ago. The Agricultural Machinery Momentum Index decreased from 107.9 in July to 104.4 in August. Declines in agricultural, construction, and mining machinery production weighed on the Index, which was partially offset by a 4.6% M/M increase in U.S. meat and egg exports. While Index readings remain historically strong, recently slowing momentum indicates that annual growth in agricultural machinery investment may have reached a peak in Q1, with further declines possible over the next six months.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	-6.9%
Investment Growth (Q/Q, SAAR)	-25.4%
Vertical Investment (SAAR)	\$26.5 Billion
Share of Total E&S Investment	1.1%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Construction Machinery

Investment in Construction Machinery grew 10.4% (annualized) in Q2 2026 and is now 14.5% above its year-ago level. The Construction Machinery Momentum Index fell from 104.7 (revised) in July to 102.8 in August. The downtick was primarily driven by a 4.1% M/M decline in multifamily housing permits and a 0.6% M/M decline in existing home sales in June. Overall, the Index's position suggests that annual investment in construction machinery should remain solid but may moderate from its current pace over the next two quarters.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	+14.5%
Investment Growth (Q/Q, SAAR)	+10.4%
Vertical Investment (SAAR)	\$53.8 Billion
Share of Total Investment	2.1%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Energy & Electrical Equipment

Investment in Energy & Electrical Equipment ballooned 44.9% (annualized) in Q2 2026 and is up 12.6% Y/Y, strong increases compared to Q1 (+0.9% Q/Q annualized and +0.1% Y/Y). At the same time, the Energy & Electrical Momentum Index fell from 109.9 in July to 107.4 in August. The decline was largely driven by a 1.4% drop in diesel fuel prices in July and a 0.7% decrease in average weekly hours among agricultural, mining, and construction machinery manufacturing workers in June. Overall, the Index suggests that annual investment growth in energy and electrical equipment may have reached a peak and could moderate over the next six months.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	+12.6%
Investment Growth (Q/Q, SAAR)	+44.9%
Vertical Investment (SAAR)	\$81.7 Billion
Share of Total Investment	3.6%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Industrial Equipment

Investment in Industrial Equipment jumped 26% (annualized) in Q2 2026 and is now 9.6% above its year-ago level. The Industrial Equipment Momentum Index dipped from 110.7 (unrevised) in July to 109.0 in August. A recent pullback in the S&P 500 Industrials Index dragged on momentum, offsetting a 5,000-job rise in manufacturing employment in July. Although the Index edged lower from last month, momentum remains strong by historical standards, suggesting that annual growth in industrial equipment investment should remain solid over the next two quarters.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	+9.6%
Investment Growth (Q/Q, SAAR)	+26.3%
Vertical Investment (SAAR)	\$219.8 Billion
Share of Total Investment	8.8%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Medical Equipment

Investment in Medical Equipment decreased 4.4% (annualized) in Q2 2026 and is 7.0% below its year-ago level. The Medical Equipment Momentum Index inched up from 98.4 (revised) in July to 99.2 in August. The Index was driven higher by several indicators in June, including a 21% Y/Y surge in federal government spending on health, a 7.2% Y/Y rise in medical products consumption spending, and a 0.1% M/M uptick in industrial production of medical equipment. The Index continues to suggest that annual investment growth in medical equipment likely bottomed out in Q2 and should improve over the next six months.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	-7.0%
Investment Growth (Q/Q, SAAR)	-4.4%
Vertical Investment (SAAR)	\$118.3 Billion
Share of Total Investment	4.7%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Technology Equipment & Software

Investment in Technology Equipment & Software rose 13% (annualized) in Q2 2026 and is up 19% Y/Y. The Technology Equipment & Software Momentum Index increased from 130.4 (revised) in July to 133.9 in August. Despite the S&P 500 Information Technology Index having retreated from a recent peak, momentum continued to rise due to gains in several other indicators, such as communication equipment shipments (+26% Y/Y in June) and consumer goods shipments (+8.6% Y/Y in June). The Index's elevated position points to continued strength in annual technology equipment and software investment over the next two quarters.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	+18.6%
Investment Growth (Q/Q, SAAR)	+12.6%
Vertical Investment (SAAR)	\$1.5 Trillion
Share of Total Investment	61.6%

Current and Previous Readings

U.S. Equipment & Software Investment Momentum Monitor

Transportation Equipment

Investment in Transportation Equipment surged 29% (annualized) in Q1 2026 but remains 5.7% below its year-ago level. The Transportation Equipment Momentum Index rose from 99.2 (unrevised) in July to 102.4 in August. The Index improved due to three consecutive months of growth in capacity utilization of transportation equipment manufacturing, as well as a 24% M/M jump in motor & aviation gasoline consumption in May. Looking ahead, the Index's current position suggests that annual growth in transportation equipment investment likely turned a corner earlier this year and should continue to improve over the next six months.

Summary of Current Conditions

Historical Strength of Vertical Momentum	
Historical Strength of Investment Growth	
Investment Growth (Y/Y)	-5.7%
Investment Growth (Q/Q, SAAR)	+29.2%
Vertical Investment (SAAR)	\$303.9 Billion
Share of Total Investment	12.1%

U.S. Equipment & Software Investment Momentum Monitor

How to Read the Monitors

Each Momentum Monitor index signals the direction and magnitude of expected growth in equipment investment over the next six months. It is important to note that index values do not correspond to specific growth rates. Instead, the Momentum Monitor indices should be interpreted within the context of prior index readings and investment growth. For example, there are several simple rules to follow when examining the latest index values:

- 1 At point 1, the Index is **increasing** and signals that **investment is likely to accelerate** over the next six months. Notice in the chart below that the bold blue line (the Index) peaks first, followed by investment growth (the dotted dark blue line).
- 2 At point 2, the Index is **decreasing** and signals that **investment is likely to decelerate/weaken** over the next six months. However, given that investment growth is roughly 8% Y/Y at point 2 (as denoted by the right axis), growth will likely remain positive.
- 3 At point 3, the Index is **relatively flat** and signals that **no significant change in investment** over the next six months.

To help the reader interpret the latest Momentum Monitor signals, a summary report for each equipment vertical follows a specific template:

- (1) The first sentence reports the latest annual growth rate for investment in a given equipment vertical, providing context for interpreting the Index's near-term growth signal.
- (2) The second sentence conveys the Index's current reading compared to recent readings.
- (3) The third sentence describes recent movements in key indicators that influenced the Index's latest reading. In many cases, certain indicators will contribute positively to the Index while others will detract from it — the Index reading reflects these offsetting impacts.
- (4) The fourth sentence provides a directional forecast for year-over-year investment growth over the next two quarters based on the Index's recent movement and historical strength.

U.S. Equipment & Software Investment Momentum Monitor

How to Use the Monitors

The Momentum Monitor is designed to provide an accurate and reliable signal of turning points in the investment cycle for seven equipment verticals, making it a valuable leading indicator for the equipment finance industry. ELFA members can use forward-looking Momentum Monitor data to assess their portfolios against likely future trends in equipment investment activity. In practice, this could mean setting more aggressive growth targets for specific types of equipment during times of relative strength or tempering expectations and scaling back or delaying expansion plans during times of relative weakness. Firms that read the Momentum Monitor each month and use it to inform their strategic planning will be better positioned to quickly adapt to changing market conditions as they emerge.

For example, the May 2022 Momentum Index for Transportation Equipment pointed to improving growth in annual transportation equipment investment over the next six months. A predication that turned out to be accurate, as investment went from -16% Y/Y in May 2022 to a peak of 37% Y/Y in June 2023.

- 1 Starting in late 2021, the Transportation Equipment Momentum Index climbed even as annual investment remained in contraction (-16% Y/Y), peaking in October 2022.
- 2 The Index's rise preceded a sizeable improvement in investment beginning in Q3 2022, with annual growth reaching 30% by the end of the year.
- 3 Annual investment growth remained strong for nearly a full year, but the Index peaked in October 2022 and declined steadily through May 2023. This signaled early that the market would soon cool.
- 4 As predicted by the Index, Y/Y investment growth began to slow in the spring of 2023 and fell to the 3-6% range over the next year.

Importantly, the Momentum Monitor is most powerful when paired with complementary data sources. Broad indicators like GDP provide context for overall business conditions while sector-specific data like ELFA's [CapEx Finance Index](#) (CFI) and [Monthly Confidence Index](#) (MCI-EFI) can support or temper expectations set by the Monitors. The CFI, in particular, has been shown to be a leading indicator for economic forecasting. Used together, these tools help ELFA members interpret current market conditions, anticipate near-turn upswings and downswings, and ultimately make better business decisions using economic data.
